Profile

Computer Engineering student with hands-on experience in cloud technologies, backend development, and database systems. Currently working as a Cloud Engineer Intern at Huawei, while also bringing previous experience in payment systems development using C#, .NET, SQL Server, ADO.NET , and Entity Framework Core. As a former Huawei Cloud Volunteer Trainer, I have delivered practical training on Huawei Cloud services including ECS, OBS, RDS, IAM, and VPC. Interested in building scalable and reliable cloud-based systems and pursuing a career in cloud engineering and infrastructure.

Professional Experience

08/2026 – Present

Istanbul | Hybrid

Huawei

Cloud Engineering Intern

- Participating in Huawei ICT Academy cloud training programs to strengthen practical knowledge of cloud technologies, services, and solution architecture.
- Collaborating with mentors and team members to develop a cloud-based project within the Huawei ICT Academy Innovation Track, focusing on technical planning, feasibility, and solution design.

09/2023 – Present

Kütahya

Huawei Student Developers – Dumlupınar University

Technical Unit Coordinator | Former Education Coordinator

Huawei Student Developers is a Huawei-supported university program where students lead technology communities and develop technical projects.

- Led technical project planning, task coordination, and development processes for club initiatives and technology competitions.
- Organized and moderated technical sessions involving university students and industry professionals as the Education Coordinator.

07/2026 – 08/2026

Istanbul | Hybrid

Tech4Pay

Software Development Intern

- Worked on backend and database development for payment systems using C#, .NET, and SQL Server.
- Developed data access and business logic components using ADO.NET , Entity Framework Core, REST APIs, CRUD operations, and layered architecture.

11/2025 – 07/2026

Remote

Huawei

Volunteer Cloud Trainer 

- Delivered practical training sessions on Huawei Cloud architectures and services, including ECS, OBS, RDS, IAM, and VPC.
- Conducted hands-on laboratory sessions through Huawei KooLabs to help participants build practical cloud skills and prepare for cloud certification pathways.

08/2025 – 09/2025

Remote

Microsoft AI Summer Internship Program

AI Engineering Intern 

- Developed and evaluated LSTM- and GRU-based stock price prediction models using PyTorch and historical financial data.
- Performed data preprocessing, model evaluation, and result visualization using Pandas, NumPy, scikit-learn, and Matplotlib.

10/2024 – 06/2025
Kütahya

Artun UAV Team

Software Team Leader [🔗](#)

- Led a six-member software team developing autonomous flight and mission-control systems for the TEKNOFEST International UAV Competition.
- Coordinated task distribution, development tracking, and integration across navigation, mission animation, and communication modules.

09/2024 – 12/2024
Remote

Yetkin Gençler

Trainee | YetGen Program Participant [🔗](#)

- Completed a 12-week development program focused on teamwork, effective communication, career planning, Excel modeling, social innovation, and digital literacy.
- Collaborated on team-based assignments and developed a project idea aligned with the UN Sustainable Development Goals during the GirişGen Ideathon.

Education

2022 – Present

Kütahya Dumlupınar University

B.Sc. in Computer Engineering (GPA: 3.06 / 4.00)

- Entering 4th year in the 2026–2027 academic year.
- Completed a one-year English preparatory program (B1 level).

Awards

02/2026

2nd Place — Huawei Developer Competition Europe [🔗](#)

- Presented an AI-powered accessibility solution built using Huawei Cloud infrastructure to the Huawei Europe jury.
- Contributed to mobile development, cloud integration, hands-on testing, and the technical demonstration of the solution.

09/2025

1st Place — BTK & Huawei R&D Coding Marathon 2025 [🔗](#)

- Developed an AI-powered accessibility solution running on Huawei Cloud as part of a three-member team.
- Actively contributed to mobile development, Text-to-Speech integration, cloud service implementation, and system testing.

05/2025

2nd Place — Hamilik Okulu Foundation Idea Marathon [🔗](#)

- Developed a viable sustainability- and social-impact-focused venture concept as part of a four-member team.

Skills

Technical Skills

- **Cloud & Infrastructure:** Huawei Cloud, Docker, Kubernetes, kubectl
- **Backend & APIs:** C#, .NET, ASP.NET Core, Entity Framework Core, ADO.NET, REST APIs
- **Databases:** SQL Server, PostgreSQL, MySQL
- **Programming Languages:** Python, JavaScript, Java

Soft Skills

- Leadership & Initiative
- Team Collaboration
- Problem Solving
- Ownership
- Adaptability
- Continuous Learning

Projects

EduVisionAI – Huawei Cloud-Based AI-Powered Accessibility Application

React Native, Python, Text-to-Speech, Huawei Cloud

- Developed mobile interfaces, user flows, and accessibility-focused features for an AI-powered application designed for visually impaired users.
- Actively contributed to integrating, running, and testing the application's AI, Text-to-Speech, and supporting services through Huawei Cloud infrastructure.
- Worked on end-to-end system integration between the mobile application, AI services, and cloud infrastructure.
- Contributed to the development, cloud integration, and technical presentation of the project versions that achieved 1st place at the BTK & Huawei R&D Coding Marathon and 2nd place at the Huawei Developer Competition Europe.

PaymentSystem – Layered Payment System Backend | Ongoing

C#, ASP.NET Core, Entity Framework Core, SQL Server, REST APIs

- Currently developing a backend project in the payment systems domain using C#, ASP.NET Core, SQL Server, and Entity Framework Core.
- Separating the solution into Domain, Application, Infrastructure, and API layers to establish clear dependency boundaries.
- Implementing repository, service, DTO, and interface structures for data access and business logic.

FonIQ – AI-Powered Investment Fund Analysis Application

React Native, Expo, Node.js, Express, Google Gemini API

- Developed a mobile application for exploring, filtering, and comparing TEFAS investment funds.
- Built a Node.js and Express backend service to manage data requests and address client-side CORS limitations.
- Integrated the Google Gemini API to provide AI-assisted fund insights and conversational features.

StockPriceAI – AI-Based Financial Market Analysis and Prediction

Python, PyTorch, LSTM, GRU, Pandas, NumPy, Streamlit

- Developed a financial analysis and price prediction system covering BIST100, global markets, and cryptocurrencies.
- Trained and evaluated LSTM- and GRU-based models using MAE, MSE, RMSE, loss curves, and actual-versus-predicted comparisons.
- Built an interactive Streamlit interface to present market analysis results and predictions.

Personal Portfolio Website

HTML, CSS, JavaScript

- Developed and deployed a responsive personal portfolio website to showcase my projects, technical experience, and achievements.
